Science Expo 2016

It’s Wilmeth’s 4th annual Science Expo and 9th annual Science Fair!! Our discovery projects and science fair projects have been so well done over the last few years! We have even had a student who won the Regional Grand Prize for Science Fair!!!

We are so excited to offer our students a variety of ways they can make discoveries and explore science!

Science Fair

Ready to conduct an experiment and present your results on a display? Use the McKinney ISD Science Fair Handbook to help you complete the project and put together your display board.

These will be judged and three (3) winners will be selected to compete at the Regional Science Fair in February.

One winner will be selected from the 1st-2nd grade division, one winner will be selected from the 3rd-4th grade division and one winner will be selected from the 5th grade division. Kindergarten students may do a project, but are not able to compete at regionals.

Discovery Displays

Interested in exploring science concepts, but not ready yet for a Science Fair Project? A great way to participate is the option of doing a Discovery Display.

Still following the regional safety rules, you can create one of the following Discovery Display options: diorama, model or freestanding poster.

• Make a model of a science concept. Then explain your model on your display OR
• Conduct some research and make a display to present your findings OR
• Do a simple experiment and share your results.

Details

• Turn in your Science Expo Registration form by Wednesday, December 16th.
• The Science Expo is January 12th. Parent Showcase is that night from 5:30-6:30pm.
• You may not grow mold or bacteria. You may not use harmful chemicals. All Science Fair Projects and Discovery Displays must follow the Safety and Display Rules (located on the back of this page).
• See the Wilmethe Website for more Science Expo Information!!!
