

## Greetings Future Fourth Graders!

Congratulations on completing 3rd Grade! We are very excited that you will be joining us in 4th grade next year at Wolford. There are so many fun and interesting things that you will have the opportunity to learn about next year. Having more than one teacher is just one of them! Be sure to check out our fourth grade weebly this summer for LOTS of great information at [www.wolford4th.weebly.com](http://www.wolford4th.weebly.com).

Studying all about Texas is a fun and thrilling part of fourth grade. Exciting topics like the regions of Texas, Native American tribes, and the Battle of the Alamo will be researched. You will also be learning about cowboys and Texas Heroes! You will get to participate in our Famous Texans Living Wax Museum and improve your writing skills at Camp Write-A-Long! As a fourth grader, you will continue to improve your comprehension strategies as you read interesting non-fiction articles along with exciting novels like The Boy in the Alamo.

You can look forward to an electrifying year of science as well, as you dissect owl pellets, make an electromagnet, and learn more about the solar system. You will participate in many exciting investigations as you learn more about various systems. In math, you will delve into the thrilling world of long division and double digit multiplication. You will also be participating in various projects to learn new math skills, and don't forget about Math Court! Are you ready to show the proof, the whole proof, and nothing but the proof? Finally, you will get to decide how to spend one million dollars! Over the summer, you can practice your math facts using Timez Attack, a FUN game you will LOVE to play! There will be a future 4th graders account set up for the summer. If you would like to be added to this account, contact Jennifer Entrekin at [jentrekin@mckinneyisd.net](mailto:jentrekin@mckinneyisd.net). She will add you to the account. You can then check out the link on the math page of our weebly to install the game and start playing. Have FUN!!

As you can see, you have a lot to look forward to next year! Fourth grade will be a great learning experience for you, so get your thinking cap ready! Be sure to read lots of great books this summer, keep a journal of your summer adventures, and sharpen those math skills using Timez Attack!

We look forward to seeing you next year!  
Fourth Grade Teachers
